Instructions

1. Print the picture frame
2. Cut it out along the orange outline
3. If you are drawing your own photo do that now
4. If you are using an actual photo you will want to trim your photo so it doesn't cover any of the characters on your frame and then glue it in the white square
5. If you are putting your picture in an actual frame you can put that in the frame now or you can set the frame as it is in your favorite spot in your room
6. Don't forget we love to see how you use the frames. Don't forget to send us images of your frames to Hello@MikiTaylor.com
